Course Endorsement For Trainers

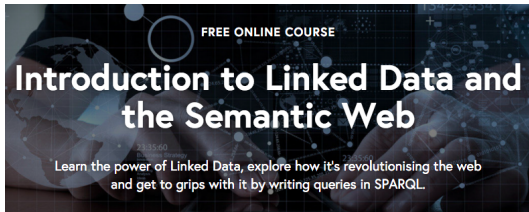

EDSA have developed values which will enable us to promote data science courses in the EU that are aligned with the aims of the project. Find out how to adhere to EDSA's values by viewing them at <http://edsa-project.eu/overview/edsa-values/>.

Survey

The Official EDSA Survey

Support us in developing an industry-aligned curricular framework for training the next generation of world-leading data scientists in the EU. Please fill out the survey located at <http://edsa-project.eu/resources/survey/>.

Sign Up to the Linked Data MOOC

The EDSA project are proud to announce that we have now launched the MOOC: "[Introduction to Linked Data and the Semantic Web](#)". Offered by the University of Southampton, the topic is becoming increasingly popular within the data science community.

Free Course on Process Mining

Process mining provides a critical, process-centric perspective on data, which is not available with classical data mining or machine learning techniques. Learn more from the MOOC, by enrolling here: <https://www.futurelearn.com/courses/process-mining>.

The big data dilemma

EDSA Contribute to HoC Report

The value of big data has brought with it many benefits, including increasing the GDP by 2.3%, but also many concerns regarding its usage, particularly within government and large businesses... <http://edsa-project.eu/the-big-opportunity-of-big-data/>.

What is a Data Scientist?

Dr. Dave Tarrant, trainer at the ODI and EDSA partner, says: "a key aspect of data science is all about culture – about innovating openly and in a team environment"...
